

ABOUT ME

After working for the past few years in QA/automated testing for Squarespace, I decided to pursue a career as a Software Engineer. I love being a developer and get a real kick out of writing clean, maintainable, beautiful code.

What motivates me is creating software/web apps that save people time, make their jobs easier and that they love to use.

I enjoy being a generalist and understanding the big picture. I have skills across the full stack and love to take on challenging projects to develop my skills.

Enthusiastic collaborator and life-long learner.

EDUCATION

LAUNCH SCHOOL

Programming and back-end development
2020 - Present

GENERATION AUSTRALIA
Junior Web Developer Program
2020 - 2021

SKILLS / TRAINING

HTML
CSS (Bootstrap, Tailwinds, Styled Components)
Photoshop / Illustrator / InDesign / Figma
JS (React, Svelte, Next.js, Node.js, Babel/Webpack/esbuild)
TypeScript
PHP / WordPress
Git
Bash / Shell Scripting
Linux Server Administration
CI/CD
AWS (Lambda, EC2, EBS, S3, Route 53, CloudFront)
Google Cloud Platform / Firebase
Understanding And Using REST APIs
HTTP Essential Training
Automated Software Testing/QA
SQL / Database Management
Unit Testing (Jest, Jasmine, Mocha / Chai)
Cypress / Modern Automation Testing
Test Driven Development (TDD)
Data Structures / Algorithms
Agile / Scrum Methodologies

EXPERIENCE

SKYJED - MELBOURNE / REMOTE

Software Engineer

- Identification and resolution of bugs/issues.
- Creation of new features, and improving the existing functions of a SaaS application.
- Migration of components from existing codebase to React.
- Implemented automated testing tools and processes to raise overall code quality and confidence in deployments.
- Research and implementation of new CI/CD tools to automate development processes.
- Owner of security compliance and control measures in accordance with ISO27001 certification.

GENERATION AUSTRALIA - BOOTCAMP

Junior Web Developer

- Learned fundamentals of web development, including HTML, JavaScript, CSS, bootstrap, responsive web design, Babel, Git, wire framing, bash/shell scripting, Linux administration, Agile/Scrum, unit testing, TDD, data structures and algorithms.
- Introduced to different problem-solving strategies and ways to break tasks down into smaller pieces.
- Developed behavioural and mindset skills such as effective communication, conflict resolution, the importance of a growth mindset, resilience and many others, with role-plays and real-world examples.

SQUARESPACE - REMOTE

QA Specialist / Developer Support (Remote)

- Supporting client developers to use the product API to create their own integrations.
- Co-writing test strategy and test plan documentation for Acuity Scheduling's integration into the Squarespace CMS.
- Maintaining and improving automated tests in Ghost Inspector / migrating existing tests to Cypress.
- Performing manual tests of code deployed to the staging environment.
- Communicating with developers any relevant outcomes, including bugs/performance issues, and then verifying fixes.

ACUITY SCHEDULING - REMOTE

Software Integration Specialist

- Assisting customers to change the style and layout of their scheduling page using CSS and JavaScript.
- Heavily involved in the product improvement cycle.
- Developing custom code to meet the needs of clients.
- Training and mentoring new staff.
- Conducting webinars that show off what is possible with the software and getting people excited about using it!
